A BETTER COURSE

“ WELCOME TO THE **WHOLE IN ONE** ”

For twenty-five years, Frontier Golf has meticulously created, expanded and fine-tuned the North American golf landscape - one course at a time. Founded in 1992, Frontier Golf has built the enviable reputation as one of the industry's **most innovative and skilled course builders**. Its original construction work and renovation expertise can be found at finer private clubs, resorts and daily-fee venues from New Hampshire to California in the States, as well as the Caribbean and Central America.

The firm's focus on exceptional service is complimented by technical innovation unmatched in the industry. From concept to completion, Frontier Golf brings an obsession with efficiency and attention to detail to every project that translates directly into cost and time savings for our clients.

Accordingly, when Frontier Golf sits down with the architect, club manager and course superintendent to plan its work, we review the entire undertaking from start to finish.

It's our job to formulate the best possible solutions, and provide the best product in our industry and it's a job we do **better than anyone**.

Frontier Golf is known across the golf industry for our dedication to only the best practices, perhaps because we are never satisfied with anything less. **Innovation is central in our approach**. We draw on decades of experience to evaluate and apply the latest advances in GPS, agronomy, construction, irrigation, erosion control prevention and drainage technologies. Because we are on the Frontier, we are instrumental in developing the new state of the art.

Building or refurbishing a championship-quality golf course is a job for experts. Only a select few can honestly claim the **specialized know-how** required across the spectrum of course-construction disciplines, and even fewer can claim the experience that we have at Frontier Golf. Over the last decade, we have performed over \$200 million in golf course construction and renovation work. **The finest clubs in North America have turned to Frontier Golf** for turn-key course construction, renovation and irrigation services, precisely because we offer these proven capabilities. And for us there is no challenge, great or small, that is beyond our capability.

- **RENOVATION**
- **NEW CONSTRUCTION**
- **IRRIGATION**

IF WE BUILD IT, THEY WILL COME

From concept to completion, Frontier Golf brings an obsession with efficiency to every project. That translates directly into cost and time savings for our clients.

COMPANY SERVICES

“WE CAN DO IT FOR YOU”

POPPY HILLS GOLF COURSE

RENOVATION

We understand that superior course renovation calls for a combination of disciplines different from new course construction. Frontier Golf is one of **golf's most trusted course renovation and restoration specialists.**

Frontier Golf has also pioneered the use of new technologies in the service of effective preservation and refurbishment. Our Global Positioning Systems, for example, can map existing green contours to within fractions of an inch, allowing the exact re-creation of putting surfaces following the installation of 21st century drainage technologies. We are experts in the subtle art of fortifying older courses with the latest construction techniques, turf types, and irrigation methods. With Frontier Golf **state of the art goes hand in hand with tradition.**

SHERWOOD COUNTRY CLUB

NEW CONSTRUCTION

After twenty-five years in the course construction business, **our project leaders have the skill** to optimize all the variables; if ignored or glossed over, these complex factors could adversely influence the performance of your course in the decades to come.

Ensuring the finished course product appeals to the client's target audience, whether members, the public or resort golfers. These are just a few of the considerations we routinely consider before the first spade of dirt is ever turned. Because each job presents its own unique site, time and design challenges, the contractor must be able to problem solve and adapt themselves on any given project. Our ability to do just that, **sets us apart from the rest.**

IRRIGATION

As craftsmen for finer golf courses across the globe, **we understand what it takes** to keep them performing at their best. Effective irrigation is critical, as it keeps the course healthy ensuring aesthetic appeal and preserving the value of your investment. Golf course irrigation systems are very complex, taking into account a myriad of influences including soil conditions, weather patterns, playability considerations and more. At Frontier Golf, we are proud to work with the finest irrigation consultants the industry has to offer.

LASER ROBOTIC IMAGE SCANNER

GPS TECHNOLOGY

At Frontier Golf, we are always looking to move forward, and firmly believe technology is what gets you there. We are **always looking to improve and find the best and most efficient golf course construction practices by using the latest technologies.**

Frontier Golf was one of the first to use laser-guided machines for grading and continue to do so with only the best and most up to date laser equipment. We have also pioneered the use of the latest state of the art Topcon Telsa GPS RTK survey system for use on golf course construction sites.

Global Positioning Systems (GPS) has become a major tool in highway and road construction because of the increased efficiency in surveying and grade management, **GPS has become a part of golf course construction because of Frontier Golf.** As pioneers of GPS technology in the golf industry, we have had continued success using the GPS for surveying sites, collecting as-built data, and mapping green surfaces.

“...the technology we offer our clients is second to none in the golf course construction industry.”

President & CEO

SPECIALTY EQUIPMENT

Frontier Golf has customized our equipment fleet with the best for performing renovation work that requires a light footprint on the existing golf course. We utilize mini-excavators with knuckle buckets for creating the finest of details in bunkers, tractors and wagons with floatation tires and also Hydrema 912 articulated dump trucks for getting bigger loads of material across an existing golf course with a minimal impact. This equipment ensures that we tread lightly on existing golf courses and **can perform renovations with great quality and efficiency.**

THE OLYMPIC CLUB — LAKE COURSE

PROJECT EXPERIENCE

Over the years, we have built a diverse portfolio of golf construction projects including new construction, renovation, and design/build ranging in scope from irrigation installations to bunker renovations as well as new 18 hole projects in the Caribbean. In short, **no project is too large, too small or too challenging for Frontier Golf.** Below are a few samples of representative projects that have been completed.

THE OLYMPIC CLUB

The project at the Olympic Club consisted of rebuilding all eighteen greens plus three practice greens to USGA specifications using GPS to preserve the original surfaces, and the renovation of four holes on the golf course in preparation of the 2012 U.S. Open. Frontier Golf constructed new tee complexes on fourteen holes as well, and reconstructed and built new greenside bunkers. Frontier Golf also completed an 18-hole renovation of the Ocean Course in 2012, and in 2016, we completed an 18-hole bunker renovation of the Lake Course.

OLYMPIC CLUB — LAKE COURSE

SHERWOOD COUNTRY CLUB

In March of 2015, Frontier Golf embarked on a seven month renovation of the prestigious Sherwood Country Club, in Thousand Oaks, California. This Nicklaus Signature Course was reworked from tee to green, including all new golf features, infrastructure drainage, state of the art irrigation system, and an extensive subsurface drainage system, capped with over ninety thousand tons of sand to provide premium growing conditions and playing surfaces. Completing this \$9.7 million project on time allowed our client to reopen with resounding approval from the membership as scheduled. Frontier Golf is proud to call the Award Winning Sherwood Country Club project a success!

SHERWOOD COUNTRY CLUB — THOUSAND OAKS, CA

POPPY HILLS GOLF COURSE

Frontier Golf continued to grow our presence in California with the renovation at Poppy Hills Golf Course in Pebble Beach in March of 2013. Throughout the 7 month project, Frontier Golf replaced the irrigation system to allow for better water control along with reducing the amount of irrigated turf on the golf course. In addition, all tees, fairways, greens and bunkers of the golf course were renovated as well as making routing adjustments to make the golf course more playable and enjoyable for golfers of all abilities.
